

Supplementary Material

Evolution of intraspecific floral variation in a generalist-specialist pollination system

Marion Leménager, John L. Clark, Silvana Martén-Rodríguez, Abel Almarales-Castro, and Simon Joly

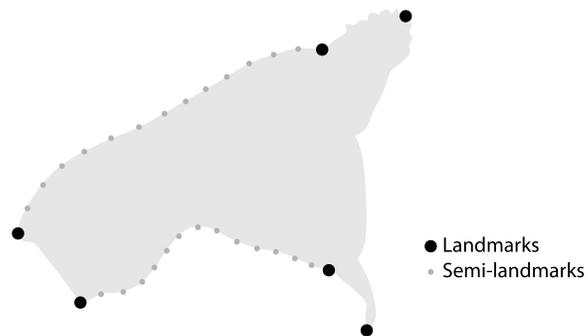

Figure S1: Landmarks (6 large dots) and sliding semi-landmarks (26 small dots) placement to characterise floral shape profiles. Landmarks are placed at the tip of the dorsal and ventral petals, at the intersection between the free and fused parts of the corolla, and at the base of the corolla. Sliding semi-landmarks are placed along the curves of the fused portion of the corolla tube (base of corolla lobes), dorsally and ventrally respectively.

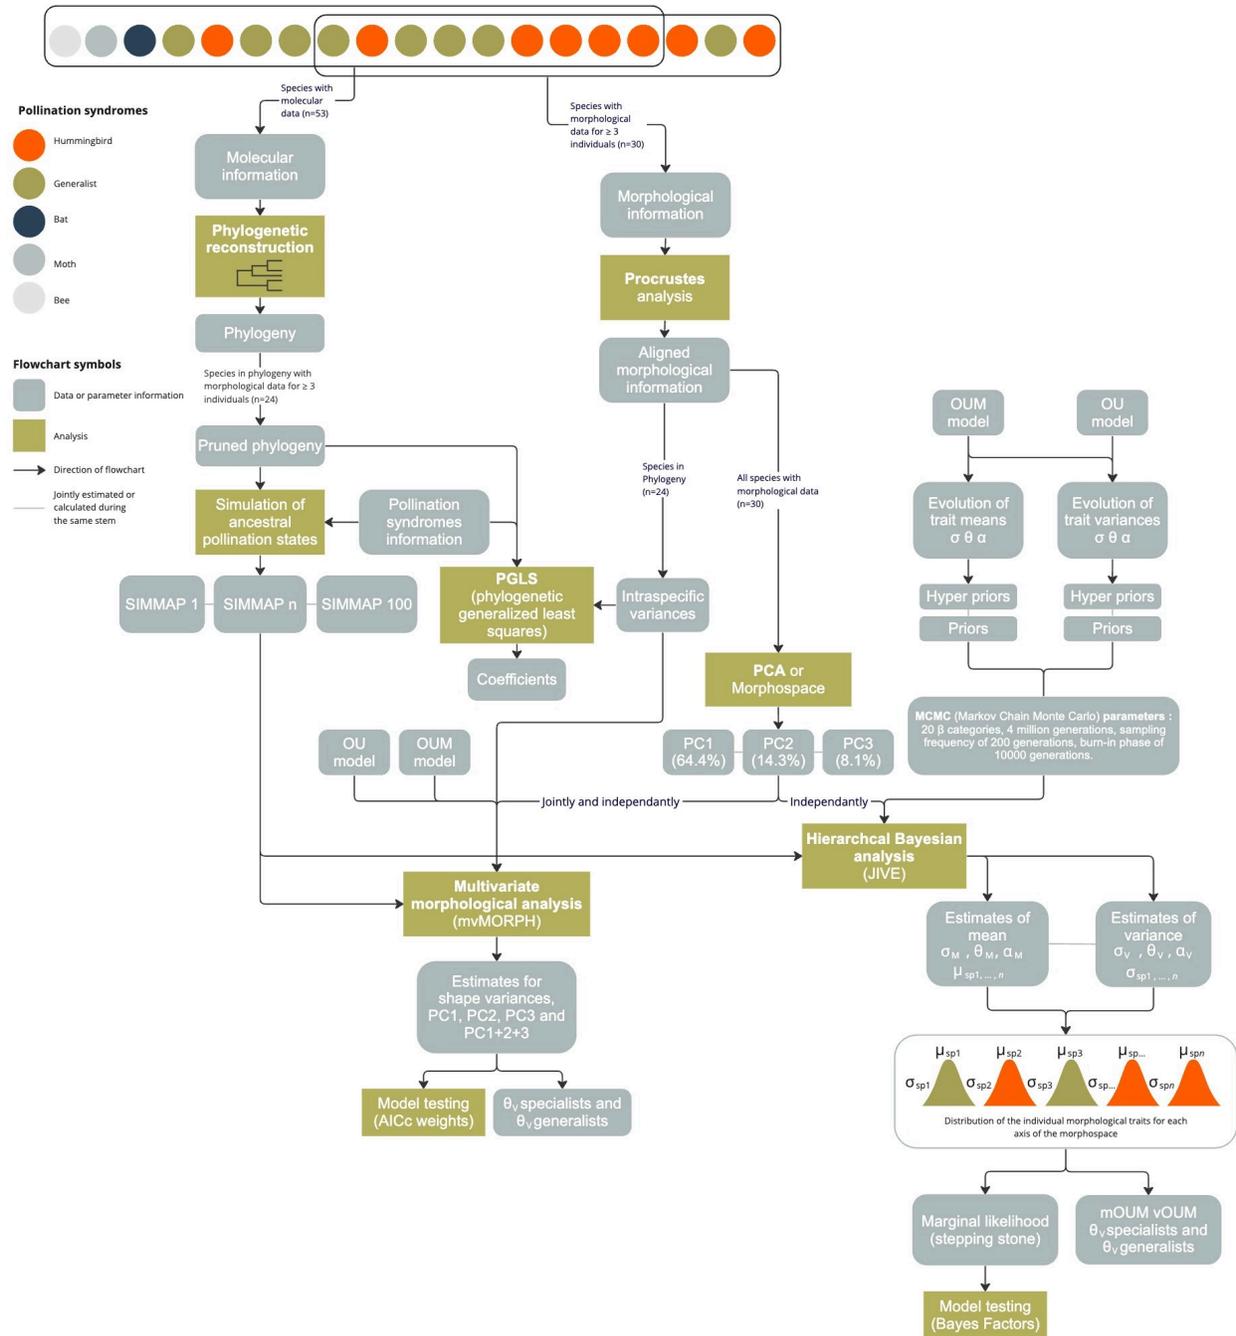

Figure S2: Methods flowchart. Individual flowers and their pollination syndromes are represented at the top of the chart. Downstream analyses are then represented by green squares, and information (molecular, morphological, results, models of evolution, and their parameter values) are represented by grey squares.

Table S1: Number of profiles per species to characterise intraspecific floral shape. Confirmed pollination syndromes are indicated in darker colours and inferred pollination syndromes are indicated in lighter colours: in orange for specialists for hummingbirds and green for mixed-pollination syndrome. Confirmed specialist for hummingbirds syndrome , inferred specialist for hummingbirds syndrome , confirmed mixed-pollination syndrome , inferred mixed-pollination syndrome .

Species	Sample size	Present in phylogeny
 <i>Gesneria acaulis</i> L.	5	Yes
 <i>Gesneria bicolor</i> (Rub.) Simon Joly & J.L.Clark	25	Yes
 <i>Gesneria bracteosa</i> Urb.	4	Yes
 <i>Gesneria citrina</i> Urb.	9	Yes
 <i>Gesneria cuneifolia</i> (DC.) Fritsch	13	Yes
 <i>Gesneria duchartreoides</i> (C. Wright) Urb.	5	No
 <i>Gesneria ekmanii</i> Urb.	4	Yes
 <i>Gesneria flava</i> Lambert, Simon Joly & J.L.Clark	3	Yes
 <i>Gesneria glandulosa</i> (Griseb.) Urb.	9	No
 <i>Gesneria harrisii</i> Urb.	3	No
 <i>Gesneria libanensis</i> Linden ex C. Morren	4	No
 <i>Gesneria nipensis</i> Britton & P. Wilson	3	Yes
 <i>Gesneria pedicellaris</i> Alain	10	Yes
 <i>Gesneria purpurascens</i> Urb.	4	Yes
 <i>Gesneria reticulata</i> (Griseb.) Urb	10	Yes
 <i>Gesneria salicifolia</i> (Griseb.) Urb.	30	Yes
 <i>Gesneria sintenisii</i> Urb.	21	Yes
 <i>Gesneria ventricosa</i> Sw.	8	Yes
 <i>Gesneria viridiflora</i> (Decne.) Kuntze	8	Yes
 <i>Gesneria viridiflora</i> (Decne.) Kuntze subsp. <i>acrochordonanthe</i> L.E.Skog	3	No
 <i>Rhytidophyllum auriculatum</i> Hook.	14	Yes
 <i>Rhytidophyllum berterioanum</i> Mart.	3	Yes
 <i>Rhytidophyllum crenulatum</i> DC.	4	Yes
 <i>Rhytidophyllum exsertum</i> Griseb.	27	Yes
 <i>Rhytidophyllum grandiflorum</i> Xu & L.E.Skog ex Zanoni, & Jiménez Rodr.	3	Yes
 <i>Rhytidophyllum leucomallon</i> Hanst.	7	Yes
 <i>Rhytidophyllum lomense</i> (Urb.) C.V. Morton	4	No
 <i>Rhytidophyllum minus</i> Urb.	10	Yes
 <i>Rhytidophyllum rupicola</i> (Urb.) C.V. Morton	5	Yes
 <i>Rhytidophyllum tomentosum</i> (L.) Mart.	3	Yes

Table S2: Pollination syndrome information for *Gesneria* and *Rhytidophyllum* species

Genus	Species	Pollinator	Confirmed	Reference
<i>Gesneria</i>	<i>acaulis</i>	hummingbird	yes	(Martén-Rodríguez et al., 2009, 2010, 2015)
<i>Gesneria</i>	<i>bicolor</i>	mixed-pollination	yes	(Faure and Joly, 2020)
<i>Gesneria</i>	<i>bracteosa</i>	mixed-pollination	no	(Joly et al., 2018)
<i>Gesneria</i>	<i>citrina</i>	hummingbird	yes	(Martén-Rodríguez and Fenster, 2008; Martén-Rodríguez et al., 2009, 2010, 2015)
<i>Gesneria</i>	<i>cuneifolia</i>	hummingbird	yes	(Martén-Rodríguez and Fenster, 2008; Martén-Rodríguez et al., 2009, 2010, 2015)
<i>Gesneria</i>	<i>duchartreoides</i>	mixed-pollination	no	(Joly et al., 2018)
<i>Gesneria</i>	<i>ekmanii</i>	mixed-pollination	no	(Joly et al., 2018)
<i>Gesneria</i>	<i>flava</i>	mixed-pollination	no	
<i>Gesneria</i>	<i>glandulosa</i>	hummingbird	no	(Joly et al., 2018)
<i>Gesneria</i>	<i>harrisii</i>	hummingbird	no	(Joly et al., 2018)
<i>Gesneria</i>	<i>libanensis</i>	hummingbird	no	(Joly et al., 2018)
<i>Gesneria</i>	<i>nipensis</i>	hummingbird	no	(Joly et al., 2018)
<i>Gesneria</i>	<i>pedicellaris</i>	hummingbird	yes	(Martén-Rodríguez et al., 2009, 2010, 2015)
<i>Gesneria</i>	<i>purpurascens</i>	hummingbird	yes	(Martén-Rodríguez et al., 2015)
<i>Gesneria</i>	<i>reticulata</i>	hummingbird	yes	(Martén-Rodríguez and Fenster, 2008; Martén-Rodríguez et al., 2010, 2015)
<i>Gesneria</i>	<i>salicifolia</i>	hummingbird	no	(Joly et al., 2018)
<i>Gesneria</i>	<i>sintenisii</i>	mixed-pollination	yes	(Martén-Rodríguez and Fenster, 2008; Martén-Rodríguez et al., 2009, 2015)
<i>Gesneria</i>	<i>ventricosa</i>	hummingbird	yes	(Martén-Rodríguez et al., 2009, 2010, 2015)
<i>Gesneria</i>	<i>viridiflora</i> subsp. <i>viridiflora</i>	mixed-pollination	yes	(Martén-Rodríguez et al., 2010, 2015)
<i>Gesneria</i>	<i>viridiflora</i> subsp. <i>acrochordonanthe</i>	mixed-pollination	no	
<i>Rhytidophyllum</i>	<i>auriculatum</i>	mixed-pollination	yes	(Martén-Rodríguez et al., 2009, 2010)
<i>Rhytidophyllum</i>	<i>berteroanum</i>	hummingbird	yes	(Joly et al., 2018)
<i>Rhytidophyllum</i>	<i>crenulatum</i>	mixed-pollination	yes	(Martén-Rodríguez et al., 2010)
<i>Rhytidophyllum</i>	<i>exsertum</i>	mixed-pollination	yes	(Martén-Rodríguez et al., 2015)
<i>Rhytidophyllum</i>	<i>grandiflorum</i>	mixed-pollination	yes	(Martén-Rodríguez et al., 2009, 2010, 2015)
<i>Rhytidophyllum</i>	<i>leucomallon</i>	mixed-pollination	yes	(Martén-Rodríguez et al., 2009, 2010, 2015)
<i>Rhytidophyllum</i>	<i>lomense</i>	hummingbird	no	(Joly et al., 2018)
<i>Rhytidophyllum</i>	<i>minus</i>	mixed-pollination	yes	(Martén-Rodríguez et al., 2009, 2015; Joly et al., 2018)
<i>Rhytidophyllum</i>	<i>rupincola</i>	hummingbird	yes	(Martén-Rodríguez et al., 2010)
<i>Rhytidophyllum</i>	<i>tomentosum</i>	mixed-pollination	yes	(Martén-Rodríguez et al., 2010)

Table S3: Images of flower profiles information and their attributions. The new images added to the data set of Joly et al. (2018) are marked in the last column with a no.

Figure S3: Scree plot of the principal component analysis (PCA), or morphospace. The first three principal components representing 86.6% of the total floral shape variation were selected for downstream analyses.

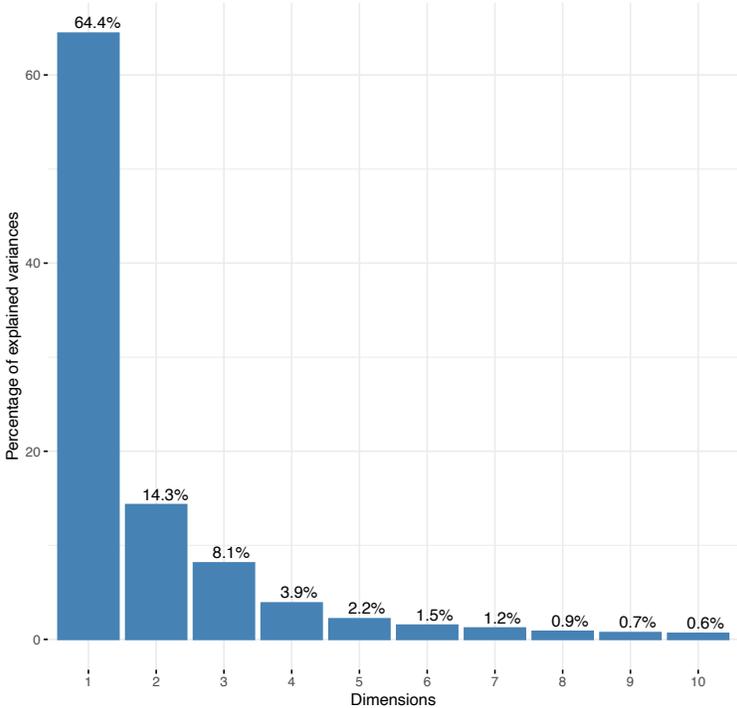

Table S4: Sequences information used in the phylogenetic reconstruction of the Antillean Gesneriaceae phylogeny using five nuclear genes.

Figure S4: Phylogeny of *Rhytidophyllum*, *Gesneria* and *Bellonia* species (Gesnerieae). Numbers in circles on the branches represent clade posterior probabilities.

Variance

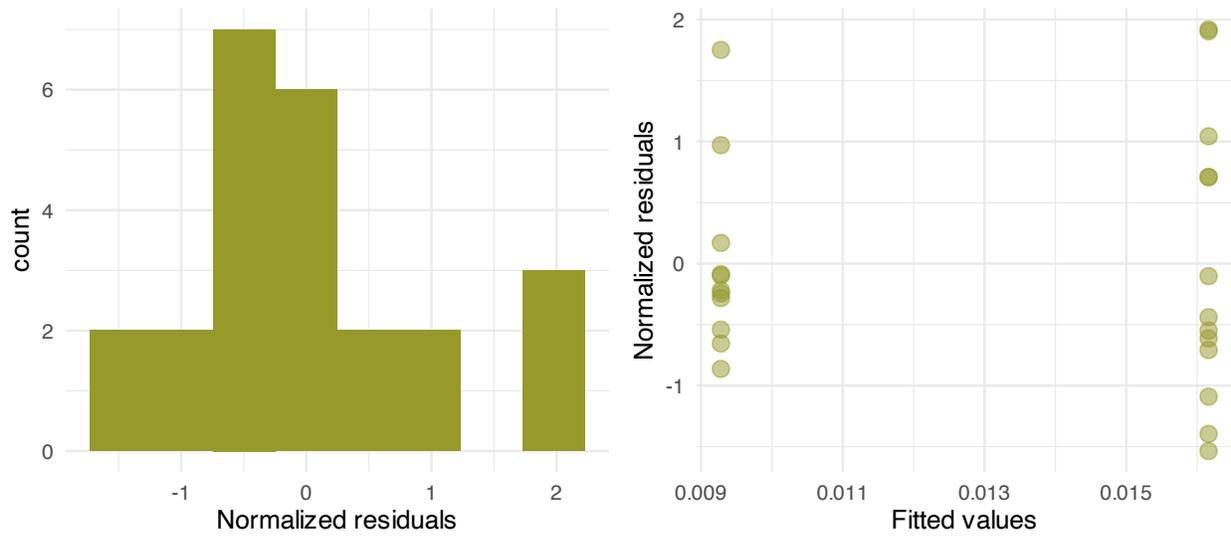

Figure S5: Residuals vs fitted plot for the phylogenetic generalised least square (PGLS) regression.

Table S5: Bayes Factors (BF) comparing the fit of the univariate (OU) and multivariate model (OUM) of evolution of the complete dataset of 100 simulations of ancestral pollination strategies (SIMMAP 1 to 100), for the first three principal components of the floral morphospace (PC1 to PC3).
